UNCERTAINTY PREVAILED ON THE STOCK MARKET.

HEAVY FEELING AND SCAT-TERING LIQUIDATION.

Fear That Seventh National Bank Has Received Only Temporary Relief.

REPUBLIC SPECIAL. New York, June 26.—The heavy tone in all departments in the London market indiinted that there was still considerable anxety as to the financial position in Germany. American stocks lost ground on the day and consols were especially weak. The set-tlement was proceeding satisfactorily and the volume of trading was exceedingly re-stricted. Money had a hardening tendency in Berlin, and there was a slightly increased demand for it in London.

In the local market uncertainty as to the

demand for it in London.

In the local market uncertainty as to the financial position and the course of money caused a heavy feeling and considerable scattering liquidation in all departments. The possibility that the Seventh National Bank had only received temporary relief caused considerable anxiety, especially in view of the fact that one Stotck Exchange house was to some extent involved with it. There was some little support in such specialties as Sugar and the tractions, and the volume of liquidation in no case was large enough to cause more than a gradual sagging movement. The steel stocks were exceedingly well supported, and there is excellent authority for saying that the quarter's carnings have been \$55,000,000.

Where the whole market is moving in one direction individual considerations lose force and the railroad stocks developed no special features. Readings were somewhat heavy on the uncertainty as to the labor position, and not improbably sympathetically affected the other hard coulers. Although the market generally was weak, it was certain that no large interests were selling stock.

Missouri Paclific stockholders have ratified the increase of \$30,000,000 in the capital London was a very small factor in the day's trading, and it would be ifheral to estimate transactions from this source at 12,300 shares. They were mostly asies due to course, to the unsettled financial position on the other side. It is said that Peoples' Glas sold in the last two days was pool stock bought considerably lower down.

4 % ON TIME DE

POSITS.

Amalgamated Copper is showing a rather better front, and it looks as if the recent liquidation for Boston was about over.

Some buil sentiment is likely to be aroused by the return of Mr. J. Pierpont Morgan, who leaves by the Deutschland tomorrow. Bulls on Southern Ratiway and the steel stocks in particular look forward with considerable confidence to the results of his presence in Wall street.

The 5-point advance in the price of refined sugar helped the stock in the early trading, although it lost ground somewhat later. Sugar showed some little strength and activity, but with this exception the market closed very lifeless in all departments. Money, after touching 5 per cent, cased off semewhat at the close, although a good deal of anxiety was expressed on this point. There was very limited business doing in all departments, and in spite of a good deal of pessimistic talk, there was remarkably little pressure of sales in any stocks.

A statement was circulated to-day that the Hudson Trust Company, transfer agent of the United States Steel Company, had mailed "dividend order forms" to the holders of the "common and preferred stock and the bondholders of the company, and this action was interpreted in Wall street as bearing on the much-discussed dividend polley of the company.

The dealings were not as heavy as on the day before, but the market was fully as excited and active, and more new high-price records were made. Brokers were well supplied with both buying and celling orders, and little trouble was found in making sales, which included \$3,000 bonds of different kinds and \$74 shares of stock. The advances made yesterday were even greater in many instances than was the case the day before, they ranging from \$4 to 7½ points. United Railways stocks and bonds were decided features in yesterday's market, and for some little time after the market opened up for business held the center of the stage. Brokers were salf to have received a great many orders to buy these securities on account of the site selected for the World's Fair, and which will materially benefit the Transit lines. There was pienty for sale at the start, but it was soon absorbed at higher and advancing prices for the stock, while the bonds were firm but unchanged, the \$3,00 that sold bringing \$39.25, at which there were sellers late and \$29.25, at which nessed everyday so far this week, was re-

asked. The best bid for Missouri yesterday was only 3111, and there was no stock offered.

The feature of the bank-stock market was National Bank of Commerce, which continues to grow in favor with investors, and to gain in price. The market started off strong under a brisk demand and the very first sale made, consisting of 30 shares, was I point higher at \$300, then followed saless amounting to 165 shares in different sized lots at \$250 50, but the last sale of 140 shares was at \$300, at which there were sellers at close and \$250 50 bid. Nothing was done in Continental National, but the market was I point higher at \$25 bid and \$252 asked. Third was quiet at \$25 bid and \$252 asked. Third was quiet at \$25 bid and \$252 asked. There was a sharp undward movement in the stock of the Fourth National, and, under the stimulus of brisk and higher bidding, the market was advanced from \$241 to \$251, at which figure 25 shares sold and \$250, at which figure 25 shares sold and \$250 was bid for more and \$251 asked. Boatmen's was in demand, and strong, a rale of 10 shares being made at \$261.50 but later as high as \$257 was bid and \$257.50 asked.

Westinghoure Automatic Air and Steam Coupler, which was the sensation a few days ago, and which has been traded in heavily all the week, was neglected and lower yesterday, not a share changed hands, and the best bid was \$54, or 1 point off from the day before, and there was a seller at \$55.50.

New York Stock Quotations.

St. Louis, Wednesday, June S. 1961.

The interest of the speculative element was attracted chiefly to the Seventh National Bank incident yeaterday, and the connection of a stock Exchange house with the disturbance. It was announced early to-day that the Seventh National Lad paid its debit promptly into the clear-ing-house. At the same time a good deal of buying in the Stock Exchange was attributed to the house in question, which was generally believed to be covering of shorts. The general understanding was tout the firm had been aggressively bearish on the market recently.
